# Some Nestlé highlights on recycled Plastics

No direct Food Contact

Food Contact

Mechanical Recycling

Chemical Recycling

## rPE in Shrinkfilm

- 50% rPE in Shrinkfilm from **post use** collection (retail, logistics)
- In some cases including 10% **post consumer** from yellow bag

## rPET in bottles

- **25% rPET** across our bottle portfolio this year
- 50% in 2025
- Key brands on 100% rPET

## rPP/rPE

- **mass balance rPP/PE** for several applications in use and in preparation
- **Currently the only available option for direct food contact**
- **Low availability**

## Key Policy asks:

- Clear political signal that **chemical recycled plastics count towards recycling quotas and recycled content targets**, complementing mechanical recycling, to give investment security **now!**
- Fair and clear, **EU mass balance allocation rules** that allow an economic business case while delivering sound environmental benefits **fast!**
- Support a **scientific, fact-based public discussion** to ensure we are **doing things right** (environment, economy, regulation) **for the entire single market!**
